The Commissioners met to discuss Video/Live Stream Commission Meeting.

Bill Rawlings has received some quotes. The first is from CKC Davis Solutions for the cabling cost. Bill estimated around 4 – 7, and it came in at 4500.00. The equipment came in at 1606.06, giving us two cameras and two microphones. CKC is about 4 – 6 weeks out to do the work. If we decide to go forward, we recommend creating a YouTube channel. We have a name we can use, Christian County, Mo. Some details would be that we want to show it live. We would want to find out how we want to archive that. We can leave it on YouTube, use our web hosting site, or we can work with Granicus. Do we want to have comments? Not in favor of having comments turned on; this is for citizens that can't attend the meeting. Disclaimer: if you are watching live and would like to ask questions or comments, you can call or email one of the Commissioners. The software that hooks into this is free. There would be, at some point, storage charges. We have to store it for one year, but we might ask Austin Fax and archive these on our Christian County Website. We could have a hyperlink that they click on to get to the county website. There will need to be a person producing the show. We can make it happen if you want an IT person here. The cameras are mountable. What budget can we take this from? Amy has an alternative recommendation, speak with Danny Gray, he mentioned to Presiding Commissioner Morris that if the Commission were willing to execute a memorandum of understanding, this room would be available for more equalization meetings, and that setup would be an eligible expense out of the assessor's fund. The assessor would have, at most, four meetings per year. Presiding Commissioner Morris will confirm with Danny after this meeting. We can put this on the agenda for next week to vote to go ahead with this. We need to do this correctly with Mr. Fax.

The meeting adjourned at 10:32 am.
