Consultant Contract for Traffic Engineering Assistance Program (TEAP) Grant

Miranda Beadles

Christian County was awarded a \$12,000 grant from MoDOT under the Traffic Engineering Assistance Program (TEAP). The project included using our current software to collect data on signage throughout Christian County. This includes location, condition, reflectivity, need, spacing, etc. This adds to our ability to maintain signage as well as providing safe direction to travelers on County roadways.

Requested by: mbeadles@christiancountymo.gov 2026-05-15 10:46

SPONSOR: Christian County, MO
LOCATION: Christian County Controlled Roadway System
PROJECT: Sign Condition Inventory

THIS CONTRACT is between *Christian County*, Missouri, hereinafter referred to as the "Local Agency", and *Olsson, Inc.*, hereinafter referred to as the "Engineer".

INASMUCH as funds have been made available by the Federal Highway Administration through its *Traffic Engineering Assistance Program (TEAP)*, coordinated through the Missouri Department of Transportation, the Local Agency intends to *review and create an electronic database of roadway signage* and requires professional engineering services. The Engineer will provide the Local Agency with professional services to support these efforts, and the Local Agency will pay the Engineer as provided in this contract. It is mutually agreed as follows:

ARTICLE I – SCOPE OF SERVICES

Task 101: Data Collection

The scope of work includes a field inventory of regulatory, warning, and guide signs located on county-maintained roadways. Data collected for each sign will include GPS location, MUTCD sign designation, district location, condition rating, and photographic documentation (sign face and surrounding context).

The Engineer will utilize a tablet and inventory software provided by the Local Agency to collect and record field data. Prior to the start of field observation, the Local Agency will conduct a coordination and training call to review the equipment, software, and data collection procedures. The Local Agency will also provide clear guidance on their established condition rating criteria (e.g. determination of a sign in “bad” condition).

A designated Local Agency staff member, familiar with the inventory requirements, will be made available to assist with initial setup and to address questions, if needed, during field activities.

Field data collection will be prioritized by area, beginning with the county’s Primary Area and proceeding to the Secondary Area as identified in Figure 1. Field inventory activities will continue until the maximum agreed upon contracted fee has been reached.

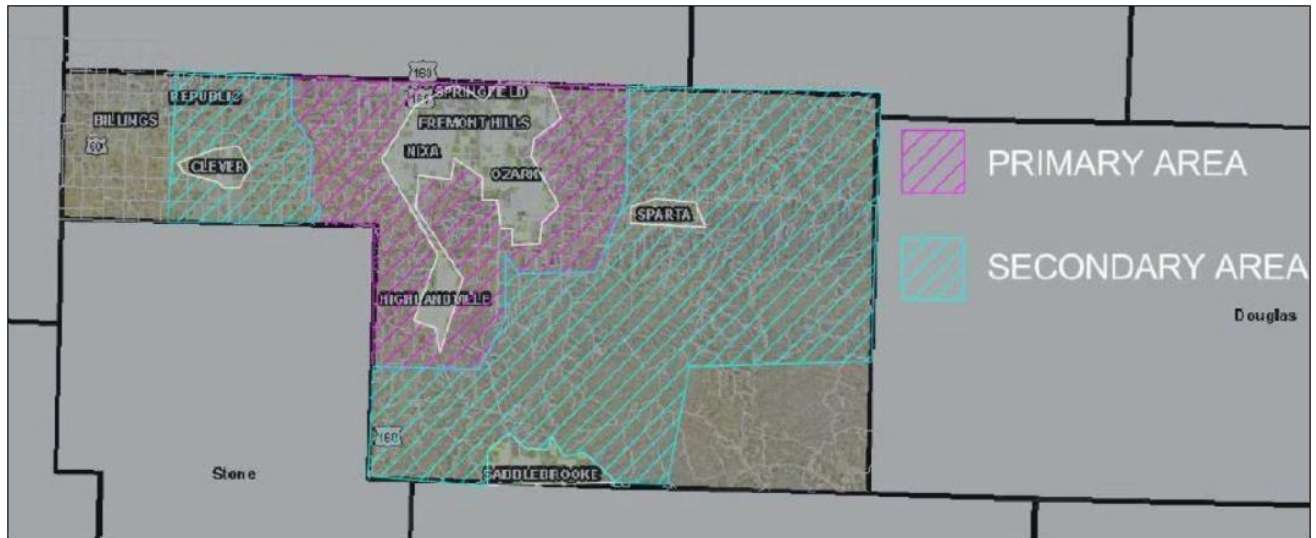

Figure 1: Primary and Secondary Study Areas

Assumptions and Exclusions:

- Retroreflectivity review will not be conducted
- Sign support analysis and structural evaluation will not be conducted

Workflow:

Field data collection will be completed by a two-person crew consisting of a driver (and spotter) and a data recorder. The crew will use tablets equipped with the County’s sign inventory application to record sign attributes in the field. The county-provided tablet will automatically upload the collected data to the County-maintained asset management database. A senior technical staff member will be available throughout field activities to provide guidance and remote support as needed.

Deliverables:

Deliverables will consist of an updated sign inventory database populated through the County’s application and integrated into the County’s existing asset management system.

Safety & logistics:

The Engineer will provide the field vehicle and personal protective equipment (PPE). Prior to initiating field investigations, the Engineer will complete an internal Job Safety Analysis (JSA) to identify and mitigate foreseen safety risks.

ARTICLE II - DISADVANTAGED BUSINESS ENTERPRISE (DBE) REQUIREMENTS:

- A. DBE Goal: The following DBE goal has been established for this Agreement. The dollar value of services and related equipment, supplies, and materials used in furtherance thereof which is credited toward this goal will be based on the amount actually paid to DBE firms. The goal for the percentage of services to be awarded to DBE firms is 0% of the total Agreement dollar value.

- B. DBE Participation Obtained by Engineer: The Engineer has obtained DBE participation, and agrees to use DBE firms to complete, 0% of the total services to be performed under this Agreement, by dollar value. The DBE firms which the Engineer shall use, and the type and dollar value of the services each DBE will perform, is as follows:

<u>DBE FIRM NAME, STREET AND COMPLETE MAILING ADDRESS</u>	<u>TYPE OF DBE SERVICE</u>	<u>TOTAL \$ VALUE OF THE DBE SUBCONTRACT</u>	<u>CONTRACT \$ AMOUNT TO APPLY TO TOTAL DBE GOAL</u>	<u>PERCENTAGE OF SUBCONTRACT DOLLAR VALUE APPLICABLE TO TOTAL GOAL</u>

Any change in compensation will be covered in the supplement.

Attachment E
Disadvantage Business Enterprise Contract Provisions

1. Policy: It is the policy of the U.S. Department of Transportation and the Local Agency that businesses owned by socially and economically disadvantaged individuals (DBE's) as defined in 49 C.F.R. Part 26 have the maximum opportunity to participate in the performance of contracts financed in whole or in part with federal funds. Thus, the requirements of 49 C.F.R. Part 26 and Section 1101(b) of the Transportation Equity Act for the 21st Century (TEA-21) apply to this Agreement.

2. Obligation of the Engineer to DBE's: The Engineer agrees to assure that DBEs have the maximum opportunity to participate in the performance of this Agreement and any subconsultant agreement financed in whole or in part with federal funds. In this regard the Engineer shall take all necessary and reasonable steps to assure that DBEs have the maximum opportunity to compete for and perform services. The Engineer shall not discriminate on the basis of race, color, religion, creed, disability, sex, age, or national origin in the performance of this Agreement or in the award of any subsequent subconsultant agreement.

3. Geographic Area for Solicitation of DBEs: The Engineer shall seek DBEs in the same geographic area in which the solicitation for other subconsultants is made. If the Engineer cannot meet the DBE goal using DBEs from that geographic area, the Engineer shall, as a part of the effort to meet the goal, expand the search to a reasonably wider geographic area.

4. Determination of Participation Toward Meeting the DBE Goal: DBE participation shall be counted toward meeting the goal as follows:

A. Once a firm is determined to be a certified DBE, the total dollar value of the subconsultant agreement awarded to that DBE is counted toward the DBE goal set forth above.

B. The Engineer may count toward the DBE goal a portion of the total dollar value of a subconsultant agreement with a joint venture eligible under the DBE standards, equal to the percentage of the ownership and control of the DBE partner in the joint venture.

C. The Engineer may count toward the DBE goal expenditures to DBEs who perform a commercially useful function in the completion of services required in this Agreement. A DBE is considered to perform a commercially useful function when the DBE is responsible for the execution of a distinct element of the services specified in the Agreement and the carrying out of those responsibilities by actually performing, managing and supervising the services involved and providing the desired product.

D. A Engineer may count toward the DBE goal its expenditures to DBE firms consisting of fees or commissions charged for providing a bona fide service, such as professional, technical, consultant, or managerial services and assistance in the procurement of essential personnel, facilities, equipment, materials or supplies required for the performance of this Agreement, provided that the fee or commission is determined by MoDOT's External Civil Rights Division to be reasonable and not excessive as compared with fees customarily allowed for similar services.

E. The Engineer is encouraged to use the services of banks owned and controlled by socially and economically disadvantaged individuals.

5. Replacement of DBE Subconsultants: The Engineer shall make good faith efforts to replace a DBE Subconsultant, who is unable to perform satisfactorily, with another DBE Subconsultant. Replacement firms must be approved by MoDOT's External Civil Rights Division.

6. Verification of DBE Participation: Prior to final payment by the Local Agency, the Engineer shall file a list with the Local Agency showing the DBEs used and the services performed. The list shall show the actual dollar amount paid to each DBE that is applicable to the percentage participation established in this Agreement. Failure on the part of the Engineer to achieve the DBE participation specified in this Agreement may result in sanctions being imposed on the Commission for noncompliance with 49 C.F.R. Part 26 and/or Section 1101(b) of TEA-21. If the total DBE participation is less than the goal amount stated by the MoDOT's External Civil Rights Division, liquidated damages may be assessed to the Engineer.

Therefore, in order to liquidate such damages, the monetary difference between the amount of the DBE goal dollar amount and the amount actually paid to the DBEs for performing a commercially useful function will be deducted from the Engineer's payments as liquidated damages. If this Agreement is awarded with less than the goal amount stated above by MoDOT's External Civil Rights Division, that lesser amount shall become the goal amount and shall be used to determine liquidated damages. No such deduction will be made when, for reasons beyond the control of the Engineer, the DBE goal amount is not met.

7. Documentation of Good Faith Efforts to Meet the DBE Goal: The Agreement goal is established by MoDOT's External Civil Rights Division. The Engineer must document the good faith efforts it made to achieve that DBE goal, if the agreed percentage specified is less than the percentage stated. The Good Faith Efforts documentation shall illustrate reasonable efforts to obtain DBE Participation. Good faith efforts to meet this DBE goal amount may include such items as, but are not limited to, the following:

A. Attended a meeting scheduled by the Department to inform DBEs of contracting or consulting opportunities.

B. Advertised in general circulation trade association and socially and economically disadvantaged business directed media concerning DBE subcontracting opportunities.

C. Provided written notices to a reasonable number of specific DBEs that their interest in a subconsultant agreement is solicited in sufficient time to allow the DBEs to participate effectively.

D. Followed up on initial solicitations of interest by contacting DBEs to determine with certainty whether the DBEs were interested in subconsulting work for this Agreement.

E. Selected portions of the services to be performed by DBEs in order to increase the likelihood of meeting the DBE goal (including, where appropriate, breaking down subconsultant agreements into economically feasible units to facilitate DBE participation).

F. Provided interested DBEs with adequate information about plans, specifications and requirements of this Agreement.

G. Negotiated in good faith with interested DBEs, and not rejecting DBEs as unqualified without sound reasons, based on a thorough investigation of their capabilities.

H. Made efforts to assist interested DBEs in obtaining any bonding, lines of credit or insurance required by the Commission or by the Engineer.

I. Made effective use of the services of available disadvantaged business organizations, minority contractors' groups, disadvantaged business assistance offices, and other organizations that provide assistance in the recruitment and placement of DBE firms.

8. Good Faith Efforts to Obtain DBE Participation: If the Engineer's agreed DBE goal amount as specified is less than the established DBE goal given, then the Engineer certifies that good faith efforts were taken by Engineer in an attempt to obtain the level of DBE participation set by MoDOT's External Civil Rights.

RE: AGENDA ITEM EXPLANATION

Commissioners,

As you are aware, the County sold lot 3 at the County Government Plaza development to a buyer who intends to develop a hotel. Part of the development of their site plan includes the management of the anticipated stormwater. While the infrastructure we built at the site was designed to accommodate the expected volume of water runoff, the specific design of how the water would get to the inlet could not be known until plans were developed.

The design professionals working on the hotel project have progressed to the point where this detail can be defined, allowing us to resolve the issue.

The attached document conveys a small easement allowing for the conveyance of stormwater both above ground and through a new storm pipe connecting to the existing water inlet located nearby on the County's property. (the attached exhibit indicates the location)

The Commission's approval of this easement will allow this project to continue moving forward.

Respectfully submitted,

Contract Amendment No. 2 - Pitt Technology Group

Kim Hopkins-Will and Bill Rawlings

Contract Amendment: IT Services Pitt Technology Group Purchasing Manager Hopkins-Will/IT Manager Rawlings

BACKGROUND FOR COMMISSIONERS:

The County entered into a contract with Pitt Technology Group effective January 1, 2024.

This Contract Amendment No. 2 will reduce the after-hours support and escalation services for the IT Department. This was intended to provide 16 hours of service per month, and we are requesting a reduction to 8 hours per month. As our CCIT department becomes more familiar with its support role, discussions with Pitt Technology Group ensued to reduce those hours. Pitt agreed.

Amendment #1 was signed by the Commission on 8/8/24 to reduce the hours from 34 hours to 16 hours per month, providing significant cost savings to the County.

Amendment #2 reduces those service hours from 16 to 8 per month.

SAVINGS: \$800 per month - \$9600 annually.

Attorney Austin Fax reviewed the Amendment.

RECOMMENDATION:

Our recommendation is to approve Contract Amendment No. 2 for Pitt Technology Group.
